

Meeting with Dean Feldman-20260804_145246-Meeting Recording

4 August 2026, 12:52pm

39m 39s

DF Dean Feldman started transcription

DF Dean Feldman 15:17
Hello?

T Terence 15:26
Oh sorry, hello everyone, how are you?

DF Dean Feldman 15:28
Yeah.

NS Nadav Sundy 15:28
Good, thanks, and you?

GR Gabriel Raz 15:29
How's it good and you?

BS Ben Swartz 15:30
Oh.

T Terence 15:31
Yeah, I'm great. I'm great. You guys got the sports analytics, Ryan, right?

DF Dean Feldman 15:36
Sports analytics, yeah.

GR Gabriel Raz 15:36
Yeah.

NS Nadav Sundy 15:36
Yes.

T Terence 15:38
Oh, okay, okay.
Um...
I'm not sure what, like, you know, I'm going to like discuss right now and stuff about, like, what I want you guys to have by your next print submission.
I think I want to give you guys a reference. Like, I don't know if you know the Open Powerlifting Federation website.
Oh.

DF Dean Feldman 16:03
The which one?

T Terence 16:05
I think it's called IPF. Wait, let me look it up.

DF Dean Feldman 16:09
The F.

NS Nadav Sundy 16:10
Oh.

DF Dean Feldman 16:11
Power lifting, yeah.

NS Nadav Sundy 16:11
The.

T Terence 16:13
Yes.
Do I have a?
Perfect.

DF **Dean Feldman** 16:22
Yeah.

T **Terence** 16:25
Yeah, I think it's this one, right? So, um...
In this website, like you have to see like information about the website, about like the powerlifting meet and stuff, right? And you're also able to like look at historical data based off of what...

NS **Nadav Sundy** 16:32
Okay.

T **Terence** 16:44
Based on what, like, you know, a coach during the meets up, like, I don't know if you know a lecturer called Jonathan Karev.
You heard of him?

NS **Nadav Sundy** 16:52
Yeah.

GR **Gabriel Raz** 16:53
No.

DF **Dean Feldman** 16:53
A signal.

T **Terence** 16:53
Yeah, Jonathan Karev is a power lifter. So, like, if you, fun fact, if you find, if you look for his name, then you'll find it in that website. He came out like 3rd place once and stuff. So, yeah. So I think maybe just look at that website as reference.

DF **Dean Feldman** 17:10
Alright, so I don't know how you want to structure it, but is it fine if we...

T Terence 17:10

Sorry.

I do.

DF Dean Feldman 17:19

I don't know. Do you want us to work at our own pace and get through what we think we should get through or do you have requirements that you want us to get through?

T Terence 17:25

No, no.

I will speak with...

I'll speak with them on whether I should like give you like user stories, or whether you should like come with your own user stories, and I just come and cheque out and like, 'cause I see if I'm a client and I'm not mocking you guys.

DF Dean Feldman 17:46

Yeah, well, if you, because when we, can we, because what we did last semester with in SD, we, what we had with our tutor is that she didn't really ask us.

T Terence 17:48

Oh.

Okay.

DF Dean Feldman 17:59

specifics. She just gave us an overview of what she wants for the whole project. And then at each, and then throughout the whole project, she let us decide, okay, we're going to do this, this and this for the sprint and this, this and this for that sprint. And then it worked really well. And I don't know, is there a possibility we can also do it that way for this time?

T Terence 18:19

That wouldn't be a problem for me. Let me just ask Brandon for his idea.

Because what I did last semester with my group is I gave them user stories each week

and yeah, that's what they did. But I'll get back to you just now. I just need to ask Brandon his idea.

DF **Dean Feldman** 18:25

Ohh.

Thank you.

NS **Nadav Sundy** 18:47

And then do you have a specific support that you'd like us to do or can we choose?

DF **Dean Feldman** 18:51

Is he talking to Brendan now, I think?

Time.

NS **Nadav Sundy** 18:54

Okay, bye.

DF **Dean Feldman** 18:56

Hi.

T **Terence** 18:56

That's up to you, whether you choose to do soccer, whether you choose to do hockey, that's all up to you.

NS **Nadav Sundy** 19:01

Perfect, thank you.

DF **Dean Feldman** 19:02

And it's only one sport draught; we don't have to accommodate for multiple sports.

T **Terence** 19:04

YouTube.

Yeah, it's only one sport.

GR **Gabriel Raz** 19:19

I think this is the website who's referring to.

DF **Dean Feldman** 19:31

Alright, that's pretty cool.

T **Terence** 19:36

Oh, by the way, do you have any questions while I wait for him? Because he's right now, he's speaking with his group right now.

DF **Dean Feldman** 19:42

No, that was our only big question.

T **Terence** 19:45

Finding.

DF **Dean Feldman** 19:46

Because, yeah, we we we worked really well as a group last time, and this in a way that I just explained to you, so it would be nice if we could do the same, if that makes sense.

BS **Ben Swartz** 19:47

I...

T **Terence** 19:47

Right.

Vishal.

Yeah, yeah.

BS **Ben Swartz** 19:52

Is that?

T **Terence** 19:58

Yeah, I think I have no problem with you guys creating your own requirements each week, but I just need to like make sure that it's okay with that.

DF **Dean Feldman** 20:03

Yeah.

No, that's fine. We have people wait.

T **Terence** 20:09

Play song, song.

BS **Ben Swartz** 20:11

And also, I think just for what is there a specific way that you want us to have these meetings, team specifically, or chat, or anything specific that is easier for you to have these meetings with us?

T **Terence** 20:26

I was actually surprised when like you sent me the link to the team's meeting. So this could work too. This could work too. But thing is, I'm free either way, whether it's in person, whether it's every Tuesday's in person, whether it's this meeting and it's okay with me, but I just need to like make sure that everything is okay with Brandon Griffith just in case.

I was supposed to.

DF **Dean Feldman** 20:45

Yeah, no. If possible, online is easier for us.

NS **Nadav Sundy** 20:49

Yeah.

T **Terence** 20:50

Yes.

DF **Dean Feldman** 20:51

But whether that's a team score or another four, yeah, something.

T **Terence** 20:53

Okay.

Uh...

Yeah, but I feel as if the meeting should happen in your, at your convenience, whether you choose to do it online, whether you choose to do it in person. As long as we have the meeting, as long as you sign the Google form, then I think that's all that matters.

DF **Dean Feldman** 21:10

Yeah, do you know the frequency of these meetings? This is a once a week, twice a week call.

T **Terence** 21:12

This is.

Right.

Two.

Whenever you need to have one with me, maybe like there's something that happened with your group and stuff, maybe like it's something you stuck at and you need to ask me, but otherwise it should be like each sprint.

DF **Dean Feldman** 21:30

So should we maybe, or can we ask you if we could have a meeting maybe every Tuesday at 2:00 on Teams and then we can, that will be the way, well, that will be our weekly meeting with you.

T **Terence** 21:34

I love it.

Xbox.

Right.

Yeah, that works with me.

BS **Ben Swartz** 21:44

Mhm.

T **Terence** 21:44
Yes.

DF **Dean Feldman** 21:44
A great.

T **Terence** 21:49
Excess.

DF **Dean Feldman** 21:53
All right, yeah, I think the only thing we're waiting for is that one question.

NS **Nadav Sundy** 22:26
Is there any advice you can give us from you doing the project last year that you got from your project? Things that either went like really well and worked with your team or things that you maybe like decided on that you would recommend we stay away from? Is there just anything that we can learn from you and from when you did the project, obviously, I think last year?

T **Terence** 22:45
Yes.
Last year, I heavily...
dependent on AI. I'm not going to lie, I heavily depend on AI. Me and my group have been dependent on AI. And you know, you guys are actually quite lucky that AI use is actually being encouraged. You know, you guys are actually encouraged to use AI, you know? I mean, even like with your guys' tests, your exams, you guys have an 8-hour hackathon where you just like, you know, provide code and you make the product that you are told to do and stuff, you know, so just heavily lean on AI. And I think maybe for your future benefit, you need to like know what you're doing and stuff, right? And yeah, I don't know if any of you guys want to be, let's say, software developers, but like for example, BBD and stuff, they... There's a certain part of the interview where they go through like your repository and stuff, right? If they go through your repository and your past projects, and then they say, okay, I explained this code and stuff, right? And so if you vibe coded that, then

chances are you might not even get that job. So I do encourage vibe coding, but to a certain point, I also do encourage knowing what you guys are doing.

NS **Nadav Sundy** 23:58

Yeah, thank you so much.

T **Terence** 24:02

That sounds great.

That's they are from a picture.

Brenda still speaking, right? But I found the website. It's called openpowerlifting.org.

No.

Like this.

I don't know if you guys heard me, but like, I think that's a good, um...

Good reference for you guys for this project.

SU **Shayna Unterslak** 26:55

Thank you, we'll look at it.

T **Terence** 26:58

Yes.

Find.

I S.

NS **Nadav Sundy** 27:06

Is it the one I just sent in the chat, openpowerlifting.org?

T **Terence** 27:08

The.

Next.

Let me take a look at it.

Oh.

Oh.

Bing, Bing.

Very simple.

Yes, it's exactly this one. And so you'll see that like as you navigate through this

website and stuff, you'll see individual lifters, you'll see individual competition meets and stuff. I don't know if you know how powerlifting works, but like, yeah, can you see like with different years in which like the meets happen and stuff? Yeah.

NS **Nadav Sundy** 27:39
Yeah.

T **Terence** 27:55
They'll also be downloaded CVCSV.
And so this is just basically a good reference for you guys when it comes to this project. Obviously you can make it more visually appealing.
Otherwise, this is a good reference for you guys.
My suggestion.

NS **Nadav Sundy** 28:14
And would we need like accounts to like kind of log in or just?

T **Terence** 28:20
Sing.

NS **Nadav Sundy** 28:21
You know, obviously this website is just the stats, but would you prefer if it was more like a, you know, you kind of log in and you can like, I don't know if it's follow certain people or follow certain kind of teams or things like that.

T **Terence** 28:24
Wow.
Play.
I think that would be unnecessary. Yeah, I think that's going to be unnecessary. I don't think there's any reason to create a profile because to create a profile it means that you need to like, you know, be getting, you need to be giving data to like the website where there's profile data and stuff like that.

NS **Nadav Sundy** 28:37
Okay.

T **Terence** 28:51

I think the only people who should have profiles are the people who are going to be submitting data to the website.

NS **Nadav Sundy** 28:51

Okay.

T **Terence** 29:00

the people who are going to be off ice to submit data to the website.

NS **Nadav Sundy** 29:04

Perfect. Thank you.

Yeah.

T **Terence** 33:55

Okay, yeah, I'm done. So question number one, you for the labs, you guys need to be here. So maybe on every other day, you can have meetings on Teams or Discord and I fight, but on Tuesdays, you need to be on campus. Like days like this, you need to be on campus, right? That's #1. Number 2 is

We can have the meetings whenever we want, like however long we want, however frequent we want, right? And yeah, #3 is...

You guys asked, okay, yeah, if I have a requirement that you guys want to work on stuff, that I want you guys to work on stuff, I can just simply tell you guys, okay, yeah, so I think maybe you should have maybe this in green and blue stuff, or maybe it doesn't suffer, but things I need to like keep track of what I'm telling you. And he doesn't, he's not really a fan of user stories and I took wording of it and stuff like, at least like.

Try to document.

What I tell you to do, but otherwise you just need to, like, you know...

Work on whatever you feel as if needs to be worked on for some stuff, right, as long as, like, you know, I'm guiding you.

And maybe if this is...

Too big for you, I can just like, maybe just like focus on like something like this, or

that is it, but otherwise I shouldn't give you like user stories and like he's really lax when it comes to user stories and stuff.

DF **Dean Feldman** 35:22

Okay, so basically it's just what you want for the next week.
Or?
Yeah.

T **Terence** 35:29

Yeah.

DF **Dean Feldman** 35:31

OK.
Um, yeah, that's I suppose fine. Can you tell us what you'd like us to do for this week then?

T **Terence** 35:42

I think it would be best to, like, let you guys decide what you want to, like, work on, but if you were to ask me, I think you need to try to...
get a minimum. Okay, let me not say minimum because that's way too much, but...
Try to replicate the website I told you guys about, as close as you can.

DF **Dean Feldman** 36:05

Okay, do you want, because obviously we're going to also want to make it look, it won't be exactly the same, so we're allowed to have some creative independence, if that makes sense.

T **Terence** 36:16

Yes, yeah, when I mean replicate, I meant to say just with functionality, you know, like being able to see, yeah, being able to see different powerlifters, being able to see the different competitions, something like the results and like maybe you came out this first place and stuff, but obviously we're not going to be talking about powerlifting. You guys are going to like choose whatever sport you're going to.

DF **Dean Feldman** 36:21
Okay, sounds good.

NS **Nadav Sundy** 36:27
The.

T **Terence** 36:37
Choose.

DF **Dean Feldman** 36:39
Cool, we can try to get that done.

T **Terence** 36:42
And I think also, like, you should try to get...
BB signing in and signing out, done by next week.
But remember, like the only people who should be able to sign in and sign out
should be the people who are authorised to upload data, because like the regular
users like you and me will only be able to view data and stuff, you know, view data,
download data, as CSV and stuff like that. And yeah.

DF **Dean Feldman** 37:09
Okay, uh, yeah, well, okay, no, that's fine. I think it's quite a lot, but Joe will work
through it, I think.

T **Terence** 37:17
No, no, it's only two things. Okay, okay, two things. No, no, no, okay. Number one,
just authorization, just like authorization and authentication stuff, and just being able
to see whatever data is in the database. You don't even need to like create the
functionality of like submitting, as long as you can just like put dummy data.
and like it displays whatever is in the database.

DF **Dean Feldman** 37:40
Can we ask you about our database? So we allow you to use Supabase.

Terence 37:45

You are allowed to use anything you want.

Dean Feldman 37:47

Just as long as it doesn't generate the API inputs, right?

Terence 37:52

Excuse me?

Dean Feldman 37:53

There was a thing inside of the requirements said that we have to hand write our API endpoints. API endpoints. So is that just the way we did it in SD, I assume?

Terence 38:06

I'm not sure about what you did in SD, but basically, when you create your API, your fellow students from other groups should be able to, like, you say, use your API for something that they want. They say, for example, they want to fetch data from your website or from your programme, so if they want to officially say player data and stuff, they need to use your API so that they can, like, Get data from your programme.

Dean Feldman 38:30

Okay, no, then that's not a problem. All right, that's fine.

Terence 38:33

I need to understand.

Dean Feldman 38:35

Alright, no, I think that's all. Anyone else got anything?

Nadav Sundy 38:39

No, all good. Thank you so much.

Terence 38:40

Yes.

You're welcome. So I will see you next week, right?

DF **Dean Feldman** 38:43

Cool, thank you.

GR **Gabriel Raz** 38:44

Thank you.

DF **Dean Feldman** 38:45

Yeah.

BS **Ben Swartz** 38:45

Exact.

NS **Nadav Sundy** 38:45

Yes, see you next week in person on Tuesday.

GR **Gabriel Raz** 38:46

Yeah.

BS **Ben Swartz** 38:48

Yeah.

T **Terence** 38:49

Yeah, on Tuesday. Well, I'll see you guys.

NS **Nadav Sundy** 38:51

Perfect, thank you so much.

DF **Dean Feldman** 38:51

Can we give you, can we set up a time with you? Can we have it like 2 P.m. every Tuesday?

T **Terence** 38:56

Okay.

Yeah, 2PM works.

DF **Dean Feldman** 38:59

Yeah, great.

BS **Ben Swartz** 39:00

Okay.

NS **Nadav Sundy** 39:00

Perfect.

DF **Dean Feldman** 39:01

Thank you. Thank you.

T **Terence** 39:02

Oh, by the way, for better communication, I'm going to send a Dean, I'm going to send you my number on e-mail so that we can better communicate over there.

GR **Gabriel Raz** 39:02

You so much.

DF **Dean Feldman** 39:09

Okay, cool. Thank you so much. We'll add you to a WhatsApp group. We'll make a group of all of us.

T **Terence** 39:15

Alright, cool. See you.

DF **Dean Feldman** 39:16

Well, thank you. Cheers.

NS **Nadav Sundy** 39:18

Perfect. Thanks so much.

BS **Ben Swartz** 39:19
Yes.

GR **Gabriel Raz** 39:20
Thank you. Bye.

T **Terence** 39:20
Yeah.

NS **Nadav Sundy** 39:21
Yeah.

● **Dean Feldman** stopped transcription
